

FREESTYLE ROBOT COMPETITION RULES

Freestyle robots are not subject to any technical restrictions. Creativity and innovation are more important than speed or power in this competition.

1. Exhibition

1. During the exhibition, the robot must be displayed in the area assigned by the organizers.
2. It is recommended to prepare a poster presenting the robot's purpose, key features, uniqueness, etc.
3. At least one team representative must always remain near the robot.
4. The robot must be demonstrated to exhibition visitors.
5. Participants must answer questions from interested visitors.

2. Presentation

1. During the presentation, participants present their robot to the judges.
2. Maximum presentation duration – 5 minutes.
3. Participants must answer judges' questions.

3. Evaluation

1. Each judge ranks the robots starting from the best.
2. Judges evaluate according to the following criteria:
 - 2.1. Idea and creativity;
 - 2.2. Detail and craftsmanship;
 - 2.3. Technological aspects and innovation;
 - 2.4. Technical level;
 - 2.5. Presentation.
3. The winner is the robot receiving the highest number of judges' votes.

4. Organization

1. The robot must be registered before the competition.
2. During registration, the robot is assigned a number which must be visibly attached.
3. The competition program is published at www.roboklubas.lt.
4. All disputes arising during the competition are resolved by the Head Judge.
